Product Specification

Super Amendment

**Soil Amendment—Super Nitrolized
Screened at 1/2 inch**

- **Commonly used when “Nitrolized Wood Shavings and or Fines” are specified.**
- **Derived from Composting wood shavings, ground green arbor wood and biosolids.**
- **Manufactured at a permitted and regulated composting facility; Manufacturer is a participant in the United States Composting Council “Seal of Testing Assurance” Program.**
- **Particle Size: Mostly 1/4 inch minus; approximately 80% at 1/4 inch minus and up to 20% up to 1/2 inch.**
- **Suggested application use rate: for soil amending 2 to 3 cubic-yards per 1,000 square feet, incorporated thoroughly 6 to 8 inches. Sandy soils or well draining soils can use up to 3 cubic-yards; otherwise, use 2 cubic-yards. Prior to planting, irrigate with 2 to 3 inches of water. After planting irrigate adequately to establish plants 5 to 10 days.**

Super Amendment is simply the best soil amendment available in the industry. The product is nutrient-rich (see laboratory analysis) and due to the abundance of nutrients, it is not recommended to add supplemental inorganic fertilizer at the time of initial application and up to 30 days after initial application.
