## **Product Specification**

### **Top Soil Blend**

**Screened at 1/4 inch**

- **Product consists of screened soil and nitrogen fortified wood at a 3 to 1 ratio.**
- **Particle Size: Screened at 1/4 inch.**
- **Suggested application use rate: 3 to 6 vertical inches of application or approximately 9 to 18 cubic-yard per 1,000 square-feet. Upon installation, it is recommended to**

**thoroughly irrigate prior to planting; followed by additional irrigation above normal for five (5) days after installation to settle in application, wash the soil profile and to adequately distribute water soluble nutrients.**

**Top Soil is an amended soil product that is ready to use. Inorganic fertilizer can be applied 15 days after planting consistent with the fertilizer manufacturer use rate specifications and as needed for plant types.**
